Petition to the Honourable John Key Prime Minister

Alliance for Sustainable Kapiti

Kapiti experiences significant traffic congestion. The NZ Transport Agency has decided to build a four-lane expressway through the middle of our precious coastal community. This is not a solution and would have dramatic impacts on many levels.

We request that the government rescinds its decision to build an expressway through the Kapiti community, and then works with the whole community in a consultative manner to develop a sustainable transport solution.

We, the undersigned, support[1]:

1. **Safety and flow improvement to State Highway 1**
   Along the current alignment, including four lanes as and when necessary, median barriers, removal of traffic lights etc.
2. **Two-Lane Western Link Road (WLR) and Waikanae River bridge**
   Built NOW to provide significant relief to State Highway 1 with maximum local connectivity, fully integrated with the surrounding centres and environment;
3. **Continue improvement to the Rail System**
   Support the efficiency of the road network through passenger and freight rail improvements including passenger services to Otaki and Palmerston North;
